To: Steve Ruben at HGS-SCI  
To: Tina Powers  
To: Kathryn Beckman

PF 261

Steve, I just received your FAS ligand disclosure materials and we are beginning work on the application. As we discussed earlier today, we can only file in the US. The Application should be ready in a few days, hopefully by Monday or Tuesday of next week. We need to make a deposit of the clone with the ATCC and also prepare a sequence listing for the patent application. Could you check the project reports to be certain that we have the most current and most correct sequence data.
